Excerpt

The abridged edition of this law school casebook is suitable for instructors who do not want to mine through a longer book to pare it down for the typical introductory course without losing key cases or key concepts. Like the standard edition, it contains explanatory notes, but with less detail than is found in the standard edition. It also omits material that is generally more suitable for more advanced corporate and securities courses. It includes unincorporated forms of doing business and covers federal securities law issues and specialized treatment of closely held corporations.

Description

xxxix, 1498 pages : illustrations ; 26 cm
