An impact of land alienation on tribal economy: An exploratory study of Sundargarh district in Odisha

Dungdung Joachim

Online published on 11 June, 2014.

Abstract

An impact of land alienation on tribal economy: an exploratory study of Sundargarh District in Orissa” is intended to give the profile, problems and perspectives of tribals, due to land alienation by the different factors in Sundargarh district of Orissa. The purpose of this study is to have an exploratory study on land alienation and make aware and sensitize to enable the tribal population to preserve immovable land assets from the scrupulous land alienation by the different development projects. This study is a humble attempt in making an original contribution to the nature of land alienation and its impact on tribal economy in Sundargarh district with following objective:

- a. To find out to understand tribal early sources of livelihood.
- b. To understand the situation of present tribal (land based) economy due to the rampant sponge iron factories in Sundargarh district.
- c. To understand the implementation and function of tribal safeguard legislation in the state of Orissa.
- d. To understand the local base Non-Government Organizations’ steps to protect the tribal economy in the district.
- e. To understand the pros and cons impact of sponge iron factories on the tribal economy (land, water, and the forest)
- f. To understand the roles and steps taken by the local base Government Organization to preserve the tribal land right in the district.
- g. To know the tribal opinion on rapid growth of sponge iron factories in the district in Orissa.

Socio-economic impacts of landfills include risks for public health derived from surface or groundwater contamination by leachate, the diffusion of litter into the wider environment and inadequate on-site recycling activities. Nuisances such as flies, odors, smoke and noise are frequently cited among the reasons why people do not want to reside close to landfills. A modern landfill is an engineered method for depositing waste in specially constructed and protected cells on the land surface or in excavations into the land surface. Despite the fact that an increasing amount of waste is reused, recycled or energetically valorized, landfills still exist. Tribes of Odisha. For some people, Odisha means the diversity it embodies which is cent percent true. This tourist destination which is known for many a reason is also known for sharing its land with 62 tribes that are 24% of the total population. These popular tribes of Odisha mainly survive on agriculture, fishing, farming, hunting and gathering all of which is characterised as subsistence economy.
