Read Listen. Working in the Royal Institution, with one of the most famous scientists in the world? There could only be one answer! Faraday's Lifetime in Context. Faraday's lifetime and the lifetimes of related scientists and mathematicians. Michael Faraday's Career at the Royal Institution. Faraday began work at the Royal Institution of Great Britain at the age of 21 on March 1, 1813. His salary was good, and he was given a room in the Royal Institution's attic to live in. He was very happy with the way things had turned out. This was an enormously important discovery for the future of both science and technology. Faraday discovered that a varying magnetic field causes electricity to flow in an electric circuit. Moving the magnet causes a current to flow.
