Abstract

This "Geologic Play Book for Utica Shale Appalachian Basin Exploration" (hereafter referred to as the "Utica Shale Play Book Study" or simply "Study") represents the results of a two-year research effort by workers in five different states with the financial support of fifteen oil and gas industry partners. The Study was made possible through a coordinated effort between the Appalachian Basin Oil & Natural Gas Research Consortium (AONGRC) and the West Virginia University Shale Research, Education, Policy and Economic Development Center.
