! American imperialism. Quite the same Wikipedia. Just better. American imperialism is a policy aimed at extending the political, economic, and cultural control of the United States government over areas beyond its boundaries. It can be accomplished in any number of ways: by military conquest, by treaty, by subsidization, by economic penetration through private companies followed by intervention when those interests are threatened, or by regime change.[4]. Well the border is indeed closed. But the Army is sending a train down there. Now, whether it's to help the Mexicans there, or to escape their problems here, I have no idea. Nigel West Dickens. American imperialism is partly based on American exceptionalism, the idea that the United States is different from other countries because of its specific world mission to spread liberty and democracy. One of the most notable instances of American imperialism was the annexation of Hawaii in 1898, which allowed the United States to gain possession and control of all ports, buildings, harbors, military equipment, and public property that had belonged to the Government of the Hawaiian Islands.

American imperialism is the economic, military and cultural philosophy which states that the United States, either directly or indirectly, affects and controls other countries or their policies. Such influence is often closely associated with expansion into foreign territories. The concept of an American Empire was first popularized during the presidency of James K. Polk who led the United States into the Mexican-American War of 1846, and to the Mexican Cession via the Treaty of Guadalupe Hidalgo and American Imperialism. The last decades of the 19th century were a period of imperial expansion for the United States. The American story took a different course from that of its European rivals, however, because of the U.S. history of struggle against European empires and its unique democratic development. At the same time, voices of anti-imperialism from diverse coalitions of Northern Democrats and reform-minded Republicans remained loud and constant. American imperialism is the economic, military, and cultural influence of the United States on other countries. Such influence often goes hand in hand with expansion into foreign territories. American presidents like to describe the United States as a force for freedom and independence in the world. Our guest, historian Daniel Immerwahr, says there are also plenty of times in our history when we've subjugated and ruled foreign lands - sometimes with bloody conquests. Well, U.S. imperialism really flowers with the Spanish-American War in 1898. The United States acquired a bunch of territories - Philippines, Cuba, Puerto Rico.
