

## MEMORIAL FUNDS AND MEDALS

*Morton Allport Memorial Fund (1879)*

The sum of £200 was raised by special subscription as a memorial to Morton Allport, a generous donor of collections to the Museum and a contributor of numerous papers, who also took an active interest in the introduction of salmon and other trout. The income accruing from the Memorial Fund is applied to the purchase of scientific books.

*R. M. Johnston Memorial Fund (1920)*

The sum of £230 was subscribed as a memorial to R. M. Johnston, Government Statistician, a member of the Society from 1883 till his death in 1918, and a Member of the Council and Vice-President for many years. During that time he contributed 103 papers, the subjects embracing statistics, geology, botany, zoology, and palaeontology. He will be remembered not only by students of social and economic science, but also by those interested in Tasmanian geology.

The Memorial Fund provides for (1) Lecture, (2) Medal to be presented to the lecturer, and (3) Purchase of books.

220 the royal society of tasmania, 1843-1943. Memorial funds and medals. Morton Allport Memorial Fund (1879) The sum of £200 was raised by special subscription as a memorial to Morton. Allport, a generous donor of collections to the Museum and a contributor of numerous papers, who also took an active interest in the introduction of salmon and other trout. The income accruing from the Memorial Fund is applied to the purchase of scientific books. R. M. Johnston Memorial Fund (1920) The sum of £230 was subscribed as a memorial to R. M. Johnston, Government. Statistician, a member of the Society of The trout-food insects of tasmania. Part I.-a study of the genotype of the mayfly genus *atolophlebia* and its life history. By The! present paper is planned to be the first of a series to be written for the Royal Society of Tasmania, dealing with the Trout-food Insects of that State. As the Order Plectoptera, or Mayflies, is the most important order of insects considered as trout-food, I propose to deal with them first, leaving the other aquatic orders for later treatment. The Royal Society of Tasmania was formed in 1843. It was the first Royal Society outside the United Kingdom, and its mission is the advancement of knowledge.[1] For faster navigation, this Iframe is preloading the Wikiwand page for Royal Society of Tasmania. The Society has historically maintained a strong connection with exploration and discovery across a broad spectrum of natural sciences, including medical, biological and geological sciences. Geologists have played an important role in the Society, beginning with RM Johnston, a highly active and influential member, who authored the first book on the Geology of Tasmania which was commissioned by the Tasmania Government in 1884 to promote exploration and mining in Tasmania. His contributions were recognised by the Society with the production of the R.M. Johnston Medal. The Royal Society of Tasmania celebrated its Centenary in October, 1943. In another part of the present volume (p. 199) Miss Somerville discusses the history of the Society, which was founded by Sir J. E. Eardley-Wilmot, Bart., Lieutenant-Governor of Van Diemen's Land, on 14th October, 1843. The Royal Society of Tasmania can claim to be the oldest genuine scientific Society in Australia; it has existed since 1843, without a break in its meetings, and it has an uninterrupted series of publications since 1844.
