

## How to Render the fundamentals of light, shadow and reflectivity

By Scott Robertson

Design Studio Press. Hardcover. Book Condition: New. Hardcover. 272 pages. Dimensions: 0.0in. x 0.0in. x 0.0in. This book is about the fundamentals of light, shadow and reflectivity; the focus is firmly on helping to improve visual understanding of the world around and on techniques for representing that world. Rendering is the next step after drawing to communicate ideas more clearly. Building on what Scott Robertson and Thomas Bertling wrote about in *How To Draw: Drawing and Sketching Objects and Environments from Your Imagination*, this book shares everything the two experts know about how to render light, shadow and reflective surfaces. This book is divided into two major sections: the first explains the physics of light and shadow. One will learn how to construct proper shadows in perspective and how to apply the correct values to those surfaces. The second section focuses on the physics of reflectivity and how to render a wide range of materials utilizing this knowledge. Throughout the book, two icons appear that indicate either observation or action. This means the page or section is about observing reality or taking action by applying the knowledge and following the steps in creating your own work. Similar to our previous book,...

Rendering is different for every situation and I love that they take the time to show examples for each. which is why the book is so long. 2. I don't have to read straight through. I can use it as a reference guide and learn techniques as I need them. In the current landscape of easy-to-use 3D rendering software, it is easy to overlook the foundations of what make a great-looking and realistic image. I have been doing 3D animation and rendering for close to 15 years and I can honestly say that this book is essential for anyone interested in that field. Not because it has tips and tricks for how to press the right buttons, but instead gives you a practical understanding that transcends software. How to Render builds on what was taught in the earlier book and now talks about lighting, shadows, reflections and materials. Again, it's a book for artists, architects and designers. The difficulty level here is up one notch, more suitable for intermediate and advanced artists. Basically, you need to know how to. Check with Basheer on Facebook.
