Voress And Taddy Mad Dayc-2) Developmental Assessment Of Young Children, Second. The Dasâ€Naglieri cognitive assessment system (CAS) test is an individually administered test of cognitive functioning for children and adolescents ranging from 5 through 17 years of age that was designed to assess the planning, attention, simultaneous and successive cognitive processes as described in the PASS theory of intelligence. CAS development began with an attempt to offer an alternative to the IQ test (Das, Kirby & Jarman, 1975, 1979). Developed and published in 1997 by J.P. Das, PhD of the Children do not just know less than adults do, there are differences in the very way that they think about and understand their experiences. The Chart below provides a better picture of what we mean by cognitive development. Milestone. Description. Approximate Age. Early object permanence. Follows an object out of sight, searches for a partially hidden object. 4-8 months.
