Book Chapter

**Publication Date**

2014

**Publication Source**

Reference Sources for Small and Medium-Sized Libraries

**Abstract**

This chapter stands out from the other chapters in this book. Whereas chapters 2-19 are arranged by subject, this one is a general reference resource guide. It includes almanacs, bibliographies, and guides to the literature, biographical sources (formerly a stand-alone chapter), general-purpose databases, and Internet search sites. Library search tools such as discovery layers are also described here. The Internet continues to have a huge impact on reference services. Some of that influence is via search interfaces like Oxford Reference or general databases like Academic Search Complete. It can also be seen with Internet sources that go beyond the library, like Google Search or Facebook. This chapter hopes to guide reference librarians by describing these changes.

General Reference Maps. These are simple maps showing important physical (natural and man-made) features in an area. Their main purpose is to summarise the landscape to aid discovery of locations. They are usually easy to read and understand. Most of the early mapping of the Earth falls into this group. General Reference maps often enlarge or emphasis some features to aid users. For example, road maps show roads boldly and may use road widths and colour to distinguish between major and minor roads. General Reference. SIS Management Data Model. The following diagram shows how the families used in SIS Management are related to one another. Reference Document : Stores the URL path to a document that is external to GE Digital APM and contains reference information related to the SIL analysis. Instrumented Function : Stores information about the instrumented functions of the safety instrumented system that you are analyzing. Translations of the phrase GENERAL REFERENCE from english to french and examples of the use of "GENERAL REFERENCE" in a sentence with their translations: The HDS received approximately 480 general reference inquiries during this same period.
