Preface This Resource Manual for the 10th edition of Nursing Research: Generating and Assessing Evidence for Nursing Practice complements and strengthens the textbook in important ways. Nursing diagnosis is a clinical judgment about individual, family, or community responses to actual and potential health problems / life processes. Nursing diagnoses provide the basis for selection of nursing interventions to achieve outcomes for which the nurse is accountable. Although nurses work within the nursing, medical, and psychosocial domains, nursing's phenomena of concern are patterns of human response, not disease processes. Nursing interventions are prescriptions for specific behaviors expected from the patient, and actions to be carried out by nurses. The expectation is that the prescribed behavior /actions will benefit the patient and /or significant other(s) in a predictable way, related to the identified problem /need and chosen outcomes.

Nursing research encompasses a wide scope of scientific inquiry including clinical research, health systems and outcomes research, and nursing education research. Clinical research, based on biological, behavioral, and other types of investigations, provides the scientific basis for the care of individuals across the life span and occurs in any setting where nursing care is provided.Â Nurse researchers, whether working alone or within interdisciplinary teams, consider appropriate boundaries between practice and research, address conflicts of interest, provide for protection of subjects, and maintain systems of checks and balances to ensure the integrity of the research enterprise. Preface This Resource Manual for the 9th edition of Nursing Research: Generating and Assessing Evidence for Nursing Practice complements and strengthens the textbook in important ways. The manual provides opportunities to reinforce the acquisition of basic research skills through systematic learning exercises, and we have placed particular emphasis on exercises that involve careful reading and critiquing of actual studies.Â Copyright Â© 2012 Wolters Kluwer Health | Lippincott Williams & Wilkins.
