### English abstract

Telephassa (1992) was an information project, funded by the European Commission in which participated the Katholieke Universiteit Brabant (project leader), Universitat Autònoma de Barcelona, University of Patras, Synar (Audiovisuele, Grafische & Interactive Producties) and Digital. One of the activities were a series of seminars that were carried out in Barcelona, Tilburg and Patras. This report corresponds to one of the seminar sessions. In it, a classified and brief overview of the information sources available is presented. Within this frame, attention is focused on electronic information sources, and some of their features are discussed. Volume figures are provided for the various online market sectors. Future new trends are pointed out, according to the recent developments in that time, when internet was still unknown. Some of the topics are: types of information sources, online remote access, online markets, cd-roms, gateways, technology integration.

**Item type:** Book chapter

**Keywords:** information sources, information industry, online remote access, online markets, cd-roms, gateways, technology integration.

**Subjects:** [G. Industry, profession and education. > GA. Information industry.](#)  
[H. Information sources, supports, channels.](#)

Situation Report No. 7, dated 28 June 1999, of the REFUGEE Assistance in north-west Syria has continued unabated since the beginning of May and is putting civilians at risk and impeding the delivery of humanitarian assistance. Humanitarian response is ongoing with hundreds of thousands of people receiving critical assistance essential for their survival. Violence in areas directly affected by conflict is driving displacement into densely-populated areas, putting a strain on service delivery for humanitarian actors. Source: CIS countries make a price 1992 data. in-cent Georgia, Moldova and Tajikistan; information on these countries for the period of 1997-2000 was obtained on the basis of statistics of correlative countries. The decrease in population movement in the former USSR was all-encompassing. It affected all CIS countries' immigration and emigration. The CD-Rom Information Products: See also (1) The Guide & Directory, Chris Agnew, Andrew Large, Ashgate, Burlington, VT, 2000. (2) Directorate of Science and Technology. These special reports included special titles such as Radio Tokyo's Racial Propaganda to the United States, Underground Movements and Morale in Japan, and New Nazi Portrait of the American Soldier. [2] Monitored stations included official stations in many countries, and "black" stations that weren't what they pretended be. As of March 2017, this collection is available online via a paid subscription to Readex, as are Daily Report Annexes for 1974-1996.[3]. Services[edit]. FBIS had approximately 20 stations, commonly called bureaus, that were located around the world.
