Islamic Spain was a multi-cultural mix of Muslims, Christians and Jews. It brought a degree of civilisation to Europe that matched the heights of the Roman Empire and the Italian Renaissance. There is no doubt that Tariq invaded Spain, but the reason for it may have more to do with the Muslim drive to enlarge their territory. The Muslim army defeated the Visigoth army easily, and Roderick was killed in battle. After the first victory, the Muslims conquered most of Spain and Portugal with little difficulty, and in fact with little opposition. By 720 Spain was largely under Muslim (or Moorish, as it was called) control.

The acceptance of female leadership in mosques and madrassas is a significant change from much historical practice, signalling the mainstream acceptance of some form of female Islamic authority in many places. This volume investigates the diverse range of female religious leadership present in contemporary Muslim communities in South, East and Central Asia, the Middle East, Africa, Europe, and North America, with chapters discussing its emergence, the limitations placed upon it, and its wider impact, as well as the physical and virtual spaces used by women to establish and consolidate their authority.

The Arab armies tried to move as far as France but were eventually repelled in 732 by Charles Martel. It was during this period that many Jews left Spain: the majority went north to Christian territories. According to some modern commentators, the Almohade invasion signaled the end of one of the most fascinating and eclectic eras of world history.

What is the relationship between religion and the politics? And, what should the philosopher, who finds himself in an unjust state, do? Islam in Spain. Quite the same Wikipedia. Just better. Islam was a widespread religion in what is now Spain and Portugal for nine centuries, beginning with the Umayyad conquest of Hispania and ending (at least overtly) with its prohibition by the modern Spanish state in the mid-16th century and the expulsion of the Moriscos in the early 17th century, an ethnic and religious minority of around 500,000 people. Although a significant proportion of Moriscos returned to Spain or avoided expulsion through forced conversion to Christianity, the practice of Islam had faded into obscurity by
