<b>Publication Year</b>	2011
<b>ISBN</b>	9780980864120 ( <a href="#">check CDU catalogue</a> )
<b>Total Pages</b>	96
<b>Language</b>	English
<b>Field of Research</b>	<a href="#">0599 - Other Environmental Sciences</a> <a href="#">0699 - Other Biological Sciences</a>
<b>Abstract</b>	This book gives an authoritative introduction to the wildflowers of the Northern Territory's Top End. It includes over 200 species from 79 families, selected for their abundance, showiness, or as typical of larger groups. A few have also been added to represent some of the less common wildflower families. This book is written for anyone interested in nature, and learning more. It is part of a series on the flora and fauna of the Northern Territory written by, and with the knowledge of, local scientists. Graham Brown, one time Curator of Entomology and Arachnida at the Museum and Art Gallery of the Northern Territory, is a well-known and long-serving Northern Territory entomologist who loves to share his knowledge and expertise in the rich and diverse natural history of the Northern Territory.

The Northern Territory (NT; formally the Northern Territory of Australia) is an Australian territory in the central and central northern regions of Australia. It shares borders with Western Australia to the west (129th meridian east), South Australia to the south (26th parallel south), and Queensland to the east (138th meridian east). To the north, the territory looks out to the Timor Sea, the Arafura Sea and the Gulf of Carpentaria, including Western New Guinea and other islands of the Indonesian Parks and Wildlife Commission of the Northern Territory, Darwin, Australia. Woinarski, J.C.Z., D. Franklin, and G. Connors. 2000b. 1993. Geomorphology of the Lower Mary River Plains, Northern Territory. Australian National University North Australian Research Unit and Conservation Commission of the Northern Territory, Darwin, Australia. Natural beauty: Kakadu National Park. TOURISM AUSTRALIA. Lost in the landscape: Wilderness and wildlife in Australia's Top End. 5343624.jpg. Spring in his step: An agile wallaby. MIKE UNWIN. Lost in the landscape: Wilderness and wildlife in Australia's Top End. 5343622.jpg. It's early morning on Home Billabong – a narrow body of water in the Mary River National Park at the heart of the Top End, that northernmost bulge of Australia's Northern Territory. Our helmswoman Amy Ricketts is referring to the huge estuarine crocodile that has claimed this oasis as his own. All eyes scan the dark waters for any sign of the misanthropic reptile.
