## Abstract

For courses in Introductory Econometrics Engaging applications bring the theory and practice of modern econometrics to life Ensure students grasp the relevance of econometrics with Introduction to Econometrics-the text that connects modern theory and practice with motivating, engaging applications. The Third Edition Update maintains a focus on currency, while building on the philosophy that applications should drive the theory, not the other way around. This program provides a better teaching and learning experience-for you and your students. Here's how: \* Keeping it current with new and updated discussions on topics of particular interest to today's students. \* Presenting consistency through theory that matches application. \* Offering a full array of pedagogical features. MyEconLab(R) is not included. Students, if MyEconLab is a recommended/mandatory component of the course, please ask your instructor for the correct ISBN. MyEconLab should only be purchased when required by an instructor. Instructors, contact your Pearson representative for more information. MyEconLab is an online homework, tutorial, and assessment product designed to personalize learning and improve results. With a wide range of interactive, engaging, and assignable activities, students are encouraged to actively learn and retain tough course concepts.

At the end of the course, you will need to sit for a final written examination of three hours duration. This examination will also count for 70% of your total course grade. Tutor-Marked Assignments (TMAs). There are six tutor-marked assignments in this course. You will submit all the assignments. Chapter 1 Introduction to Econometrics. Econometrics deals with the measurement of economic relationships. It is an integration of economics, mathematical economics and statistics with an objective to provide numerical values to the parameters of economic relationships. The relationships of economic theories are usually expressed in mathematical forms and combined with empirical economics. The econometrics methods are used to
