What you may have a choice over is not using assembler. While the lower end PICs are not perhaps best suited to C code generation, that's the compiler writer's problem; it is still more cost effective in terms of development time to use C where possible.· @Crashworks: Yes in embedded systems especially that is true, but being able to read assembler does not require you to be able to write it. · Clifford Sep 25 '09 at 7:58. add a comment |. 2.
