AFRICAN-AMERICAN BUSINESS HISTORY

Amos, Wally.  The Famous Amos Story: the Face that Launched a Thousand Chips.
Johnson, John.  Succeeding Against the Odds.
The African Diaspora describes people of African origin, living outside of the continent by choice, or most predominantly against their will, due to the Transatlantic slave trade. The diaspora is vast, and includes displaced Africans living in numerous countries all around the world. It is time for Africans in the diaspora to break free from their manufactured identities, and return to knowledge of self as an African. Together, the diaspora can do great work on the continent alongside the brothers and sisters who have remained. United States. The Pan-African Vision In Africa, there was a general assumption on the part of colonial powers that Africans must wait patiently for limited political concessions and better career opportunities. Ex-servicemen and the educated urban classes became disillusioned and were only too willing to listen to socialist ideas based on concepts of equality and a new world order. 1919 - THE FIRST PAN AFRICAN CONGRESS Racist treatment reinforced a sense of solidarity within the Diaspora. This found expression in a series of Pan-African meetings. In 1919 the first of five Pan-African Congresses was held. This was organised by the African American thinker and journalist, W.E.B. DuBois. Fifty seven delegates attended representing fifteen countries. The African Union defines the African Diaspora as "Consisting of people of African origin living outside the continent, irrespective of their citizenship and nationality and who are willing to contribute to the development of the continent and the building of the African Union." Its constitutive act declares that it shall "invite and encourage the full participation of the African Diaspora as an important part of our continent, in the building of the African Union." Within this context, the Diaspora Division serves as the counterpart of the Civil Society Division for the di... Does it refer simply to Africans abroad, that is to say the peoples of African descent who live outside their ancestral continent? Is Africa a part of the diaspora? Is the term synonymous with what is now being called the Black Atlantic? The concept of a diaspora is not confined to the peoples of African descent. The study of the African diaspora, as mentioned at the outset, represents a growth industry today. But, there is no single diasporic movement or monolithic diasporic community to be studied. For the limited purposes of this discussion, I identify five major African diasporic streams that occurred at different times and for different reasons. The first African diaspora was a consequence of the great movement within and outside of Africa that began about 100,000 years ago. African Diaspora The African diaspora [1], together with the Jewish diaspora [2]â€”the etymological and epistemological source of the term diaspora â€”enjoys pride of place in the increasingly crowded pantheon of diaspora studies. Studies of African diasporas focus disproportionately on the Atlantic world, but literature is growing on the Indian Ocean and Mediterranean diasporas. The historic African diasporas can be divided into four categories in terms of their places of dispersal: the intra-Africa, Indian Ocean, Mediterranean, and Atlantic diasporas.
