Francis. A Frequency Dictionary of Chinese. and thematic lists / Mark Davies, Dee Gardner. 1st ed. p. cm. (Routledge frequency dictionaries) Includes bibliographical references and index English language--Word frequency--Dictionaries. I. Gardner, Dee. II. Word-groups can be classified on the basis of several principles: 1. According to the type of syntagmatic relations: coordinate (you and me), subordinate (to see a house, a nice dress), predicative (him coming, for him to come) Subordinate word-groups are based on the relations of dependence between the constituents. This presupposes the existence of a governing Element which is called the head and the dependent element which is called the adjunct (in noun-phrases) or the complement (in verb-phrases). According to the structure VPs may be basic or simple (to take a book) all elements are obligatory; expanded (to read and translate the text, to read books and newspapers) and extended (to read an English book). 9. Predicative word-groups. All word-groups are divided into free word-groups and phraseological units. Free word-groups are formed in speech after some structural and semantic patterns; they are traditionally studied by syntax. They are only relatively free, because there are certain collocational restrictions. e.g. "A black-eyed girl" is all right, but we rule out "A black-eyed table" because it doesn't make sense. Thus, on the one hand, free word-groups are governed by requirements of logic and common sense. 1. The traditional and oldest principle is "thematic". It's widely used in English and American guides to idioms, phrase books, etc. Ph. units are classified according to the sphere of human activity, life, nature, natural phenomena, etc. Find a Theme Word for Each Letter: Printouts See if you can think of and write down words for an animal, food, bug, place, name, job, plant, type of word, etc. for each letter of the alphabet. Letter-Flow Printable Word Puzzles Can you figure out the words in each category? When a line connects two (or more) boxes, those boxes each contain the same letter. Word of the Day Worksheets These worksheets on elementary vocabulary have the student do an in-depth examination of a word that the teacher supplies. The student defines the word, uses the word in a sentence, identifies which part of speech
